MINISTRY OF AGRICULTURE

Weather Brief for Sunday, 16 August 2026 from the Hydrometeorological Service, Guyana.

Rainfall records for the past 24 hours, measured at 08:00hrs available for most of the stations.

Mabaruma in Region 1 recorded the highest rainfall of 20.9 mm

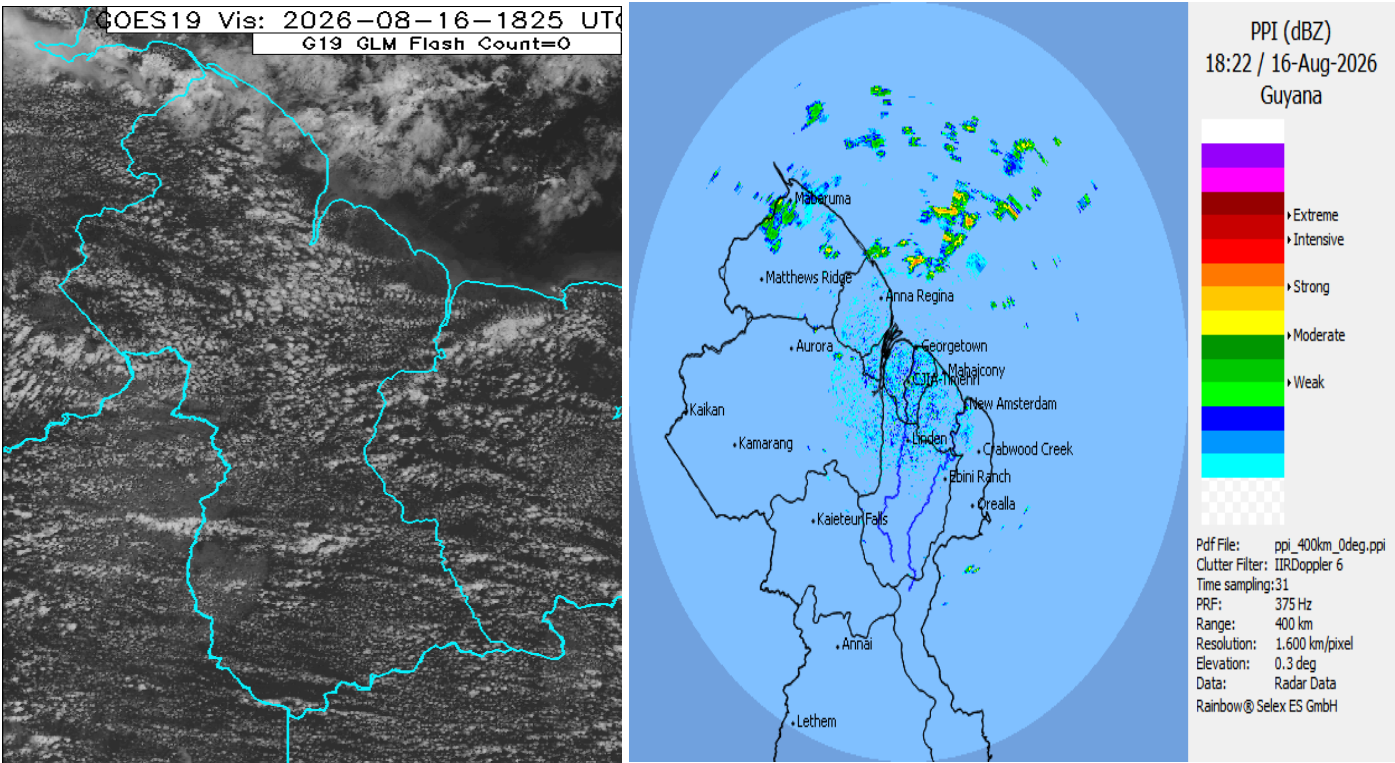

Synopsis: Persistent dry southeasterly flow will continue across Guyana throughout the week as the ITCZ remains to the north. On Wednesday, a tropical wave passing north of Guyana is expected to induce some troughing, temporarily disrupting the otherwise stable pattern. After the wave passes, the drier southeasterly pattern is expected to re-establish itself.

Today's weather review: Fair and sunny skies were observed across Guyana with isolated showers over Region 1.

Table # 1 Weather forecast for the next twenty-four hours

Sunday, 16 August 2026 (19:00 hrs – 07:00hrs.)			Monday, August 17, 2026 (07:00 hrs – 19:00 hrs.)
