

HYDROMETEOROLOGICAL SERVICE
MINISTRY OF AGRICULTURE

WEATHER BRIEF for today Monday, 10 August 2026, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Monday, August 10, 2026, were available for most stations.

Mongrippa Hill in Region 7 recorded the highest rainfall of 18.3 mm.

Severe Weather Warnings. In areas of thundershowers, heavy winds and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

Marine Advisory: Citizens are advised that the spring tide advisory is in effect. Residents of low-lying, riverine, and flood-prone areas are advised to take the necessary precautions against flooding, as over-topping is likely.

Synopsis: Low-level convergence produced isolated pockets of instabilities over Regions 1, 2 and 7. These instabilities are expected to continue throughout the evening hours. Elsewhere, ridging and lack of moisture throughout the atmosphere are dominant. Stable conditions are expected to continue over these areas over the next 12 to 36 hours. Wednesday, the tail end of a tropical wave will likely produce instabilities over Regions 1 to 7 and 10. Isolated pockets are likely to continue until Friday. Another trough system is expected on Saturday and will likely increase the instabilities over Northern Guyana.

Today's weather review: Isolated showers and thundershowers were observed over Regions 1, 2, and 7. Elsewhere, fair and sunny skies.

Monday, 10 August 2026 (19:00 hrs – 07:00 hrs)			Tuesday, 11 August 2026 (07:00 hrs – 19:00 hrs)
