MINISTRY OF AGRICULTURE

WEATHER BRIEF for today Tuesday, 09 December 2025, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Tuesday, December 9, 2025, were available for most stations.

Mahdia in Region 08 recorded the highest rainfall of 31.0 mm.

Severe Weather Advisory: Given that soils may already be saturated from heavy rainfall, and with forecast conditions indicating a strong chance of more rainfall, especially over Regions 1, 2, 3, and 6, this can likely lead to flooding or exacerbate flooding in low-lying areas and areas of poor drainage. Hilly areas can also expect possible mudslides during heavy downpours. In areas of thundershowers, lightning strikes and strong winds can also be expected. Persons should exercise caution when safeguarding life and property.

Marine Advisory: Citizens are advised that the spring tide advisory comes to an end this evening. Residents of low-lying, riverine, and flood-prone areas are advised to take the necessary precautions against flooding, as over-topping is likely.

Synopsis: *Moisture convergence continues to be the dominant feature affecting areas over Regions 1 to 3, 6, 7, and 10. This pattern is expected to continue for the next 12 to 48 hours. The mid to upper levels are expected to see a decline in moisture, which can lead to drier and stabler conditions over these areas. This is expected at the end of the week. All other areas will likely have isolated pockets of instabilities.*

Today's weather review: Cloudy to overcast skies with scattered showers, thundershowers, and rain were observed over Regions 1 to 3 and 7. Elsewhere, partly cloudy to cloudy skies.

Tuesday, 09 December 2025 (19:00 hrs – 07:00 hrs)			Wednesday, 10 December 2025 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Regions 1, 2, 3, Southern Region 6, Regions 7 and 8	 <p>Rainfall between: 10.0 mm and 30.0 mm,</p>	<p>Cloudy to overcast skies with scattered showers varying in intensity and periods of rain are expected to continue over Regions 1, 2, 3, Southern Region 6, and Regions 7 and 8. Isolated thundershowers are also likely over Regions 1, 7, and 8. All remaining areas are expected to experience partly cloudy to fair skies during the evening hours, with conditions likely to deteriorate from morning as cloudy skies accompanied by light to moderate showers are expected to persist.</p>	Coastal Regions 4 to 6	 <p>Rainfall between: 5.0 mm and 15.0 mm.</p>	<p>Cloudy skies with brief scattered showers can be expected over Coastal Regions 4 to 6 during the morning. Conditions are expected to improve from the afternoon as partly cloudy to sunny skies will likely persist. Cloudy to overcast skies with scattered showers of varying intensities, continuous rain, and isolated thundershowers can be expected over Regions 1,2,3, Southern Region 6, and Regions 7 to 10.</p>
All remaining regions	 <p>Rainfall between: 5.0 mm and 15.0 mm</p>	<p><u>Winds:</u> Gentle to moderate north-easterly breeze. Strong winds and lightning strikes are possible during thundershowers.</p> <p><u>Minimum temperatures:</u></p> <p>Coast: 22 °C – 24 °C</p> <p>Hinterland: 19 °C – 22 °C</p>	Regions 1,2, 3, Southern Region 6, and Regions 7 to 10	 <p>Rainfall between: 10.0 mm and 30.0 mm.</p>	<p><u>Winds:</u> Gentle to moderate north-easterly to easterly breeze. Strong winds and lightning strikes are possible during thundershowers.</p> <p><u>Maximum temperatures:</u></p> <p>Coast: 29 °C – 32 °C</p> <p>Hinterland: 30 °C – 33 °C</p>

Georgetown's long-term daily average rainfall for the next 10 days, from December 09 to December 18, 2025, is 9.3 mm per day.
