**WEATHER BRIEF for today Tuesday, 03 February 2026, from the Hydrometeorological Service, Guyana**

Rainfall records for the past 24 hours, measured at 08:00 hrs Tuesday, February 3, 2026, were available for most stations.

**Parishara in Region 9 recorded the highest rainfall of 1.1 mm.**

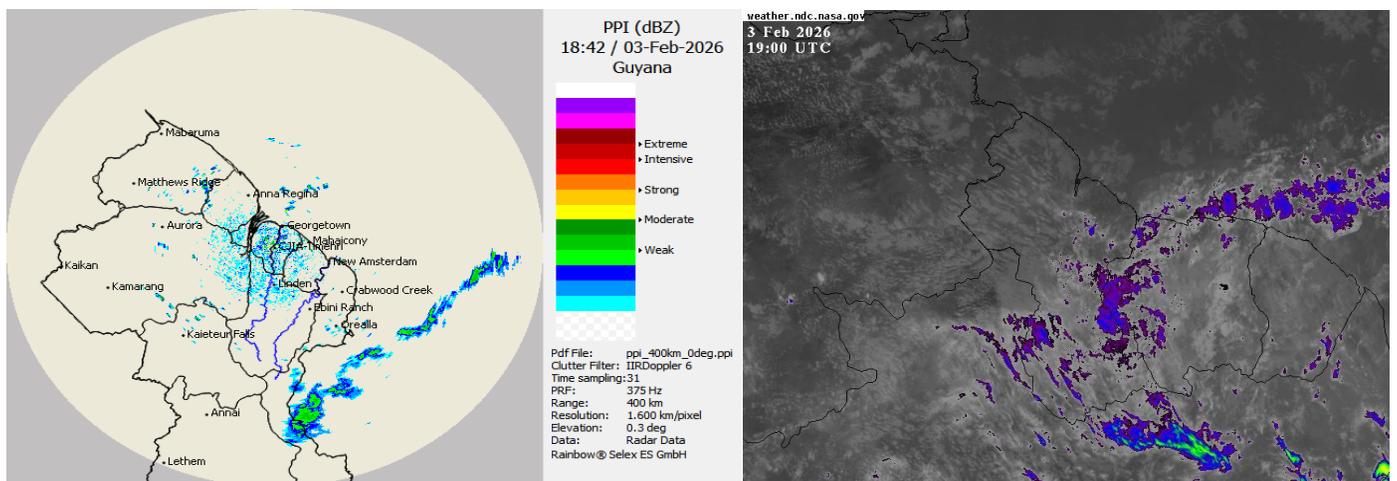

**Marine advisory: Spring tides coupled with high-energy waves will likely create dangerous sea conditions and possible overtopping and damage to river and sea defences. All marine users should remain on high alert, and persons living in low-lying coastal and riverine areas should take all necessary precautions.**

**Synopsis: The atmosphere over Guyana continues to remain stable, and this pattern is expected to continue for the remainder of the week. Ridging coupled with dry air from the low to the upper levels is the dominant feature affecting the forecast area. Nevertheless, localized conditions can produce isolated pockets of instability in Inland and mountainous areas.**

**Today's weather review: Partly cloudy to fair and sunny skies were observed over Guyana.**

Tuesday, 03 February 2026 (19:00 hrs – 07:00 hrs)			Wednesday, 04 February 2026 (07:00 hrs – 19:00 hrs)
