WEATHER BRIEF for today Thursday, 01 January 2026, from the Hydrometeorological Service, Guyana

*Rainfall records for the past 24 hours, measured at 08:00 hrs Thursday, January 1, 2026, were available for most stations.*

***No significant rainfall was recorded.***

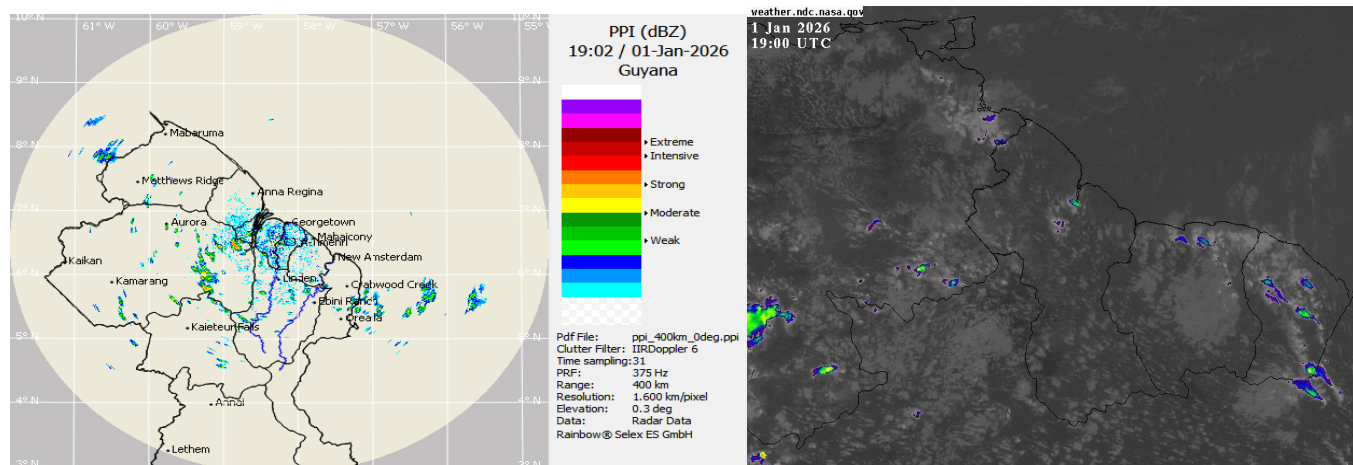

**Marine Advisory:** Residents of low-lying, riverine, and flood-prone areas are advised to take the necessary precautions against flooding as over-topping is likely due to spring tides. In addition, long-period waves can likely result in damage to sea defenses. All marine users, including seagoers, are asked to exercise caution during this time.

**Synopsis:** Mild instabilities were observed over Inland areas during the afternoon. Low-level moisture is mostly seen at the 850 mb level, created these instabilities. Mild to moderate instabilities are expected to continue over Northern Guyana, with Coastal Guyana likely to experience these conditions during the morning and Inland areas during the afternoon. Convection is not expected to be as strong as the mid to upper levels are dry and will continue to remain dry. Convective activity will likely be short-lived.

**Today's weather review:** *Cloudy skies with light to moderate showers and rain were observed over Inland areas. Elsewhere, partly cloudy to sunny skies.*

Thursday, 01 January 2026 (19:00 hrs – 07:00 hrs)			Friday, 02 January 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Coastal Guyana	 <p>Rainfall between: 0.0 mm and 10.0 mm.</p>	<p>Partly cloudy to fair skies are likely to continue over Coastal Guyana throughout the evening hours. Conditions are expected to slightly deteriorate from the late night into the early morning hours as cloudy skies with isolated showers will likely persist. Inland and Southern Guyana can expect cloudy skies with isolated to scattered showers during the evening hours, with improvements expected as the night progresses.</p>	Coastal Guyana	 <p>Rainfall between: 0.0 mm and 10.0 mm.</p>	<p>Cloudy skies with isolated showers can be expected over Coastal Guyana during the morning with partly cloudy to sunny skies likely to persist from the afternoon. Cloudy skies with isolated to scattered showers can be expected over Inland and Southern Guyana during the afternoon.</p> <p><u>Winds:</u> Gentle to moderate north-easterly to easterly breeze.</p> <p><u>Maximum temperatures:</u></p>
Inland and Southern Guyana	 <p>Rainfall between: 5.0 mm and 20.0 mm.</p>	<p><u>Winds:</u> Gentle to moderate north-easterly to easterly breeze.</p> <p><u>Minimum temperatures:</u></p> <p>Coast: 22 °C – 24 °C</p> <p>Hinterland: 19 °C – 22 °C</p>	Inland and Southern Guyana	 <p>Rainfall between: 5.0 mm and 20.0 mm.</p>	<p>Coast: 30 °C – 32 °C</p> <p>Hinterland: 31 °C – 33 °C</p>

*Georgetown's long-term daily average rainfall for the next 10 days, from January 01 to January 10, 2026, is 8.8 mm per day.*
