*MINISTRY OF AGRICULTURE*

**WEATHER BRIEF for today Thursday, 12 June 2025, from the Hydrometeorological Service,  
Guyana**

*Rainfall records for the past 24 hours, measured at 08:00 hrs Thursday, June 12, 2025, were available for most stations.*

***Maria's Pleasure in Region 3 recorded the highest rainfall of 74.4 mm.***

**Severe Weather Warnings:** Soils may already be saturated from continuous rainfall, and given the forecast conditions for the next 12 to 36 hours indicates an increased chance of more rainfall, the likelihood of flooding significantly increases in low-lying areas and areas of poor drainage. Hilly areas can also expect possible mudslides during heavy downpours. In areas of thundershowers, heavy winds and possible lightning strikes will likely be observed. Persons should exercise caution in efforts to safeguard life and property.

**Marine Advisory:** Spring tides coupled with moderate to rough waves will likely result in overtopping and possible damage to vulnerable areas of the river and sea defence. Persons are asked to take the necessary precautions against possible flooding.

**Synopsis:** *Tropical Wave #4 is the dominant feature of interest affecting Regions 1 to 7 and 10. This wave is expected to continue to affect Regions 1 and 7 throughout the night. The passage of this wave will also bring plumes of moisture from the south and affect Regions 5, 6, and 10 as the night progresses. All remaining areas will likely experience mild to moderate instabilities. Meteorological models are indicating that most of the forecast area will continue to experience mild to moderate instabilities as moisture convergence within the trades will continue to move into Guyana.*

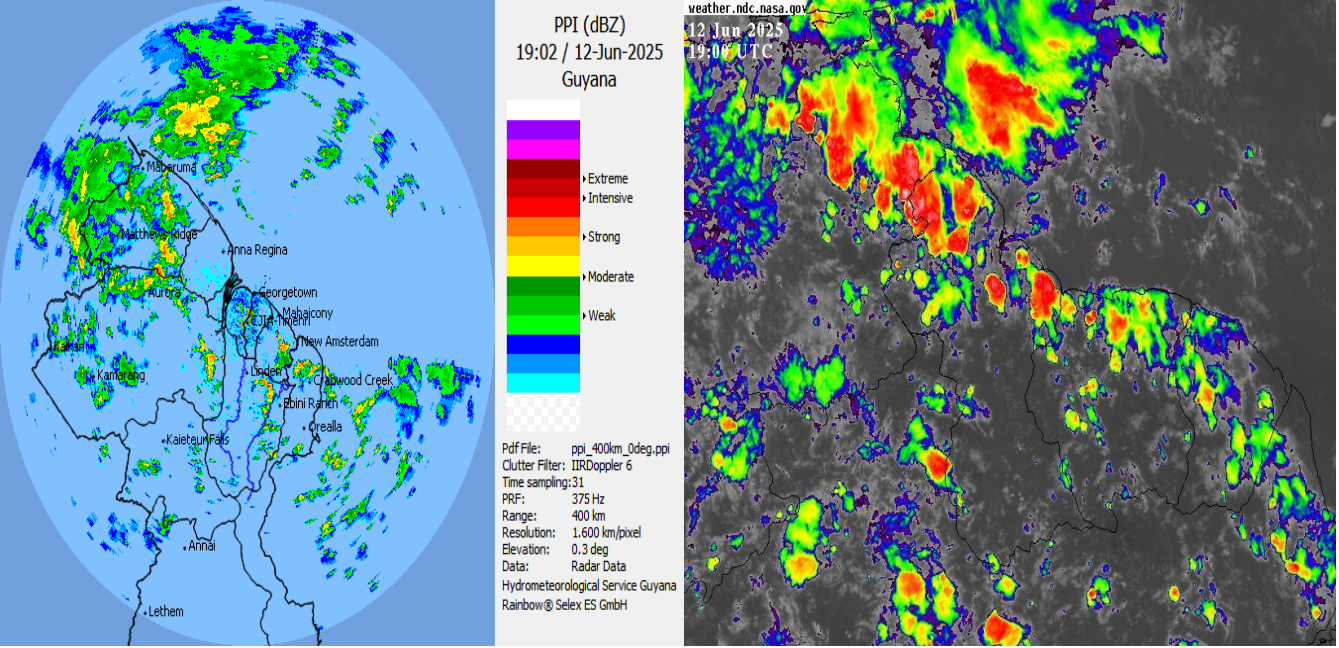

**Today's weather review:** *Cloudy to overcast skies with widespread showers, continuous rain and were observed over Regions 1 to 4 and 7. Cloudy skies with isolated showers elsewhere.*

Thursday, 12 June 2025 (19:00 hrs – 07:00 hrs)			Friday, 13 June 2025 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Regions 1 to 7 and 10	 <p><b>Rainfall between: 20.0 mm and 50.0 mm.</b></p>	<p>Cloudy to overcast skies with scattered to frequent showers of varying intensities and continuous rain will likely be experienced over Regions 1, 5, 6, 7, and 10 during the night. Isolated thundershowers are also likely over these areas. Regions 2 to 4, 8, and 9 can expect cloudy skies with isolated to scattered showers during the early morning hours.</p> <p><u>Winds:</u> Light to gentle easterly to southeasterly breeze. Strong winds and lightning strikes occur during thundershowers.</p>	Regions 1 to 5	 <p><b>Rainfall between: 15.0 mm and 45.0 mm.</b></p>	<p>Cloudy skies with scattered showers and continuous rain can be expected over Regions 1 to 5 during the morning. Conditions are expected to improve from the afternoon, as partly cloudy to sunny skies will likely persist. Regions 6 to 10 will likely experience cloudy skies with scattered showers and isolated thundershowers during the afternoon.</p>
All remaining Regions	 <p><b>Rainfall between: 5.0 mm and 20.0 mm</b></p>	<p><u>Minimum temperatures:</u></p> <p>Coast: 22 °C – 24 °C</p> <p>Hinterland: 19 °C – 22 °C</p>	Regions 6 to 10	 <p><b>Rainfall between: 5.0 mm and 30.0 mm</b></p>	<p><u>Winds:</u> Light to gentle easterly to southeasterly breeze. Strong winds and lightning strikes occur during thundershowers.</p> <p><u>Maximum temperatures:</u></p> <p>Coast: 27 °C – 29 °C</p> <p>Hinterland: 28 °C – 30 °C</p>

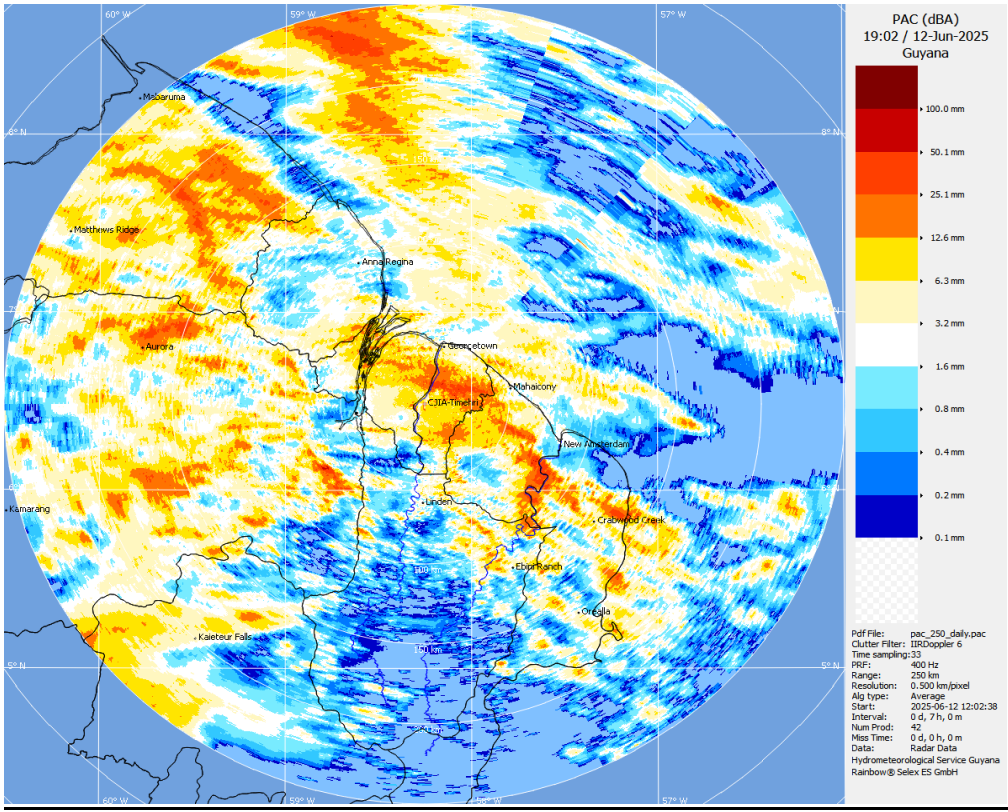

*Georgetown's long-term daily average rainfall, for the next 10 days from June 12 to June 21, 2025, is 11.5 mm per day.*
