MINISTRY OF AGRICULTURE

WEATHER BRIEF for today Sunday, 14 June 2026, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Sunday, June 14, 2026, were available for most stations.

Arpiaco in Region 02 recorded the highest rainfall of 27.4 mm.

Severe Weather Warnings: In areas of thundershowers, heavy winds and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

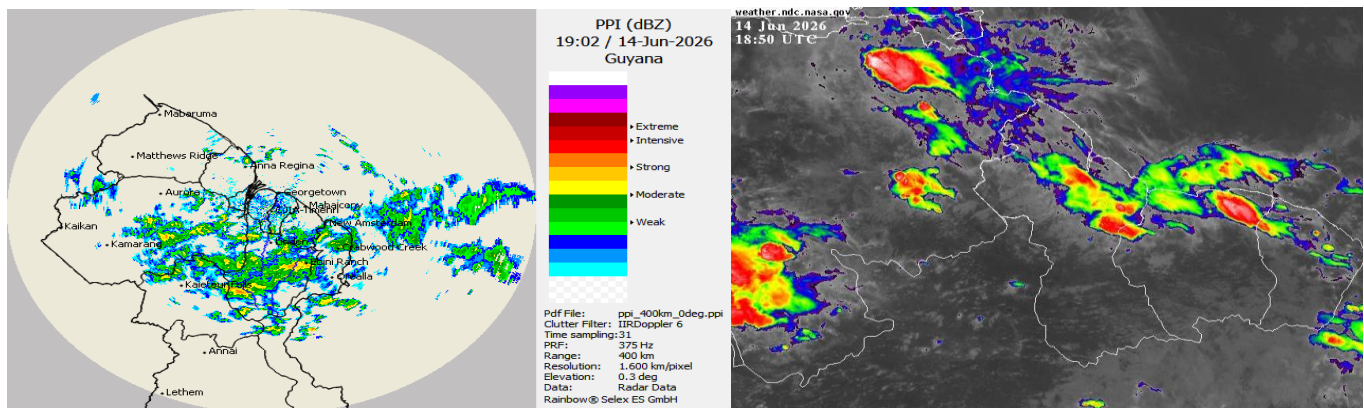

Marine Advisory: Citizens are advised that the spring tide advisory is in effect. Residents of low-lying, riverine, and flood-prone areas are advised to take the necessary precautions against flooding, as over-topping is likely.

Synopsis: Tropical wave # 14 continued to affect areas over Regions 1, 2, and 7 throughout the morning period. The wave has exited the forecast area during the afternoon, but convection behind continued to produce moderate instabilities over these areas. Regions 6, 8, and 10 also experienced moderate convection, as low-level confluence and high amounts of moisture are the dominant features over these areas. Based on the latest outputs from various meteorological models, moderate convection is expected to continue over Regions 1, 6 to 8, and 10 throughout the evening hours. Regions 2 to 5 can expect unstable conditions from the late night into the early morning, as similar low-level forcings mentioned above will also be dominant over these areas. Region 9 is expected to experience mostly stable conditions.

Today's weather review: Cloudy skies with scattered showers were observed over Regions 1, 2, Southern Region 6, Region 10, and the Inland areas.

Sunday, 14 June 2026 (19:00 hrs – 07:00 hrs)			Monday, 15 June 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Regions 2 to 5.	 Rainfall between: 0.0 mm and 10.0 mm	Cloudy skies with scattered showers of varying intensities, and intermittent rain and isolated thundershowers can be expected over Regions 1 and 6 to 8 and 10 during the night. Regions 2 to 5 can expect partly cloudy skies during the evening hours, with conditions expected to change during the early morning to cloudy skies with isolated to scattered showers that will likely persist. Region 9 can expect partly cloudy skies with no significant rainfall.	Regions 1 to 5.	 Rainfall between: 0.0 mm and 10.0 mm.	Cloudy skies with isolated to scattered showers can be expected over Regions 1 to 5 during the morning period. Conditions are likely to improve over Regions 3 to 5 during the afternoon as partly cloudy skies will likely persist. Regions 6 to 10 can expect cloudy skies with scattered showers and thundershowers from the afternoon.
Regions 1, 6 to 8, and 10.	 Rainfall between: 10.0 mm and 40.0 mm.	<u>Winds:</u> Gentle to moderate north-easterly to easterly breeze. Strong winds and lightning strikes during thundershowers. <u>Minimum temperatures:</u> Coast: 22 °C – 24 °C Hinterland: 19 °C – 21 °C	Regions 6 to 10.	 Rainfall between: 5.0 mm and 25.0 mm.	<u>Winds:</u> Gentle to moderate north-easterly to easterly breeze. Strong winds and lightning strikes during thundershowers. <u>Maximum temperatures:</u> Coast: 27 °C – 29 °C Hinterland: 26 °C – 28 °C

Georgetown's long-term daily average rainfall for the next 10 days, from June 14 to June 23, 2026, is 11.1 mm per day.

Table # 2: Occurrences of high and low tides for the next 24 hours and the times for sunrise and sunset.

Tonight (June 14, 2026)	Tomorrow Morning (15 June 2026)		Tomorrow Afternoon (15 June 2026)
<i>Low Tide 21:31 hrs Tide Height 0.71 m</i>	<i>High Tide 03:30 hrs Tide Height 3.14 m</i> <i>Low Tide 10:13 hrs Tide Height 0.35 m</i>		<i>High Tide 16:49 hrs Tide Height 2.88 m</i>
<i>Sunrise:</i>	<i>05:36 hrs</i>	<i>Sunset:</i>	<i>18:07 hrs</i>

SPRING TIDE ADVISORY: CITIZENS ARE ADVISED THAT THE SPRING TIDE ADVISORY IS IN EFFECT. RESIDENTS OF LOW-LYING, RIVERINE, AND FLOOD-PRONE AREAS ARE ADVISED TO TAKE THE NECESSARY PRECAUTIONS AGAINST FLOODING AS OVER-TOPPING IS LIKELY.

SEA CONDITIONS: MODERATE SEAS WITH NORTH-EASTERLY TO EASTERLY WAVES REACHING HEIGHTS OF 2.0 TO 2.5 METERS IN OPEN WATERS. THESE WAVES ARE LIKELY TO HAVE PERIODS OF 8 SECONDS. MODERATE TO FRESH NORTH-EASTERLY TO EASTERLY BREEZE.

Extended Forecast

Tuesday, Friday, and Saturday: Cloudy skies with isolated showers can be expected over Coastal Guyana during the morning hours. Improvements are expected from mid-morning as partly cloudy and sunny skies will likely persist. Inland and Southern Guyana can expect cloudy skies with scattered showers and isolated thundershowers. **Rainfall is expected to range between 10.0 mm and 40.0 mm over Inland and Southern Guyana and elsewhere between 0.0 mm and 15.0 mm, within 24 hours.**

Wednesday: Cloudy to overcast skies with scattered showers, rain, and thundershowers can be expected over Regions 1 to 7 and 10. Similar conditions can be expected over Regions 8 and 9, from the afternoon hours. **Rainfall is expected to range between 10.0 mm and 50.0 mm within 24 hours.**

Thursday: Cloudy skies with isolated to scattered showers and rain can be expected over Regions 1 and 2 during the morning hours. Inland and Hinterland Guyana can expect similar conditions from the afternoon. **Rainfall is expected to range between 5.0 mm and 35.0 mm. Elsewhere, partly cloudy skies with no significant rainfall.**
