WEATHER BRIEF for today Monday, 02 November 2026, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Monday, November 2, 2026 were available for most stations.

Bartica Forestry in Region 7 recorded the highest rainfall of 8.0 mm.

Severe Weather Warnings. The public is advised to take all necessary precautions as warmer than usual day and night-time temperatures are likely to continue across most of Guyana. In addition, areas of thundershowers, heavy winds, and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

Marine advisory: None at this time

Synopsis: ***Sea breeze effect coupled with moisture advection from the ITCZ produced mild to moderate convection over Region 1 and Inland areas along Regions 2 to 6. Convection is expected to move further Inland during the evening and will likely affect Regions 7 and 8. This pattern is likely to continue for the remainder of the week. Coastal and Southern Guyana observed mostly dry and stable conditions, and this pattern is expected to continue for the remainder of the week.***

Today's weather review: Isolated showers were observed over Region 1 and Inland areas.
