MINISTRY OF AGRICULTURE

WEATHER BRIEF for today Thursday, 02 October 2025, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Thursday, October 2, 2025, were available for most stations.

No significant rainfall was recorded.

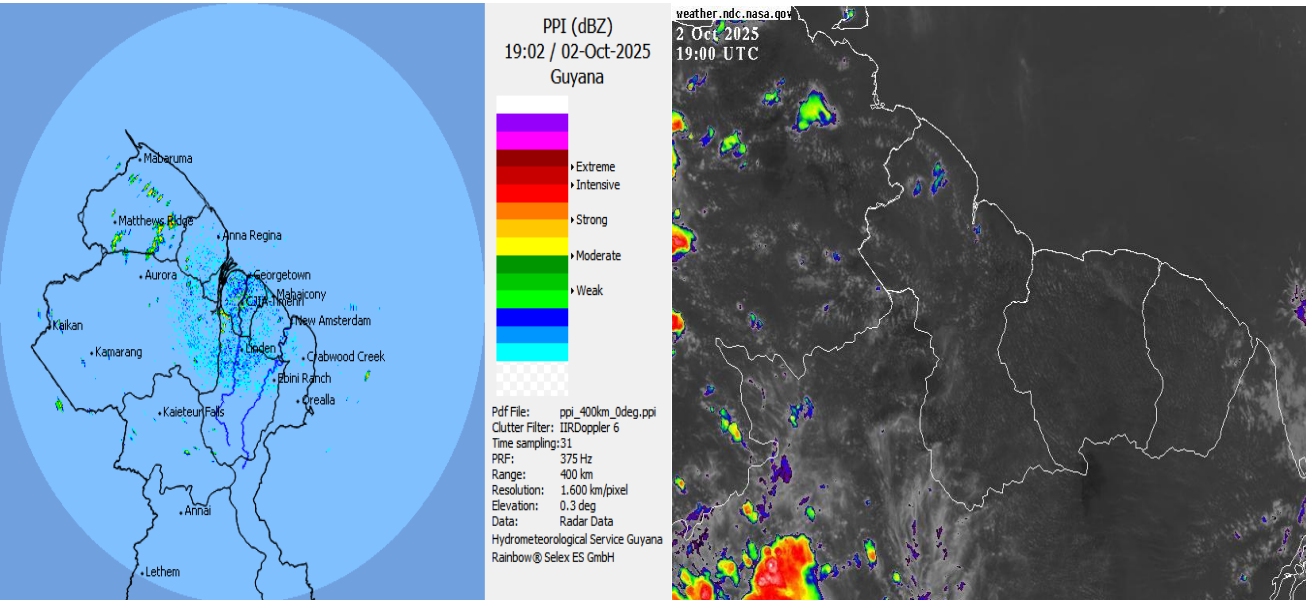

Severe Weather Advisory: In areas of thundershowers, heavy winds and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

Synopsis: *Ridging at the surface coupled with dry mid to upper level is the dominant feature of the forecast area. These features are creating stable conditions. However, localized conditions over the Inland and Hinterland areas produced mild to moderate instabilities over these areas during the afternoon. This pattern is expected to continue for the remainder of the week and into the weekend. The atmosphere is expected to become unstable from Tuesday as an increase in moisture is expected over Northern Guyana, and the ITCZ is re-establishing itself.*

Today's weather review: Partly cloudy and sunny skies.

Thursday, 02 October 2025 (19:00 hrs – 07:00 hrs)			Friday, 03 October 2025 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Coastal Regions 2 to 6	 <p>No significant rainfall expected</p>	<p>Coastal Regions 2 to 6 can expect partly cloudy to fair skies throughout the evening hours.</p> <p>Regions 1, Inland, and Southern Guyana can expect partly cloudy to cloudy skies with isolated showers and thundershowers during the evening hours, with fair and clear skies expected as the night progresses.</p> <p><u>Winds:</u> Gentle to moderate easterly to south-easterly breeze. Strong winds and lightning strikes are possible during thundershowers.</p>	Coastal Regions 2 to 6	 <p>No significant rainfall expected</p>	<p>Partly cloudy to sunny skies can be expected over Coastal Regions 2 to 6.
