WEATHER BRIEF for today Saturday, 03 October 2026, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Saturday, October 3, 2026 were available for most stations.

Hossororo in Region 1 recorded the highest Rainfall of 9.0 mm.

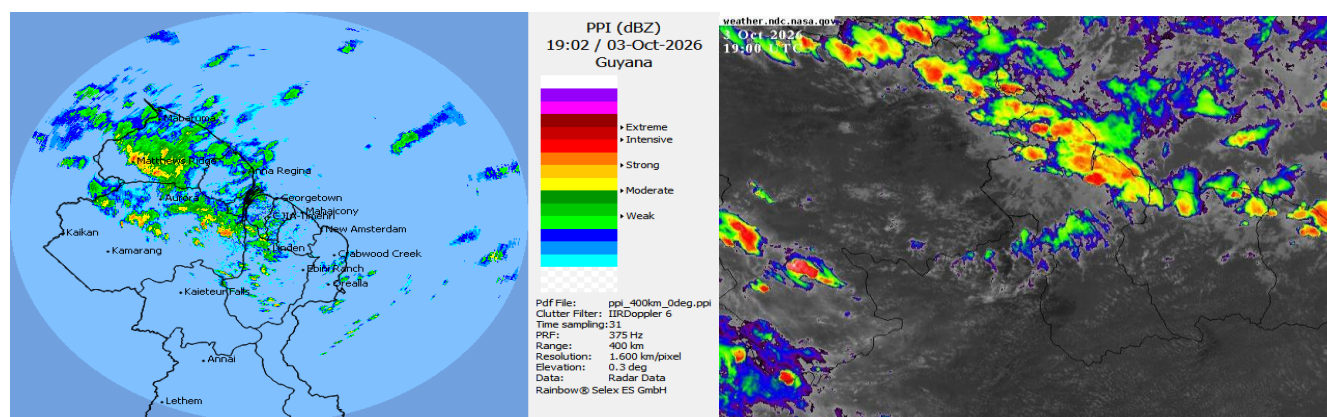

Severe Weather Warnings. Areas of thundershowers, heavy winds, and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

Synopsis: Convergence associated with the ITCZ coupled with favorable upper-level dynamics are the dominant features of interest affecting Northern Guyana today. These features created moderate convective activity over these areas, especially over Regions 1, 2, 6, 7 and Inland Guyana. Convection is expected to move further Inland during the evening hours, and areas over Regions 1, 2, 6, 7, and 8 will likely receive most of the rainfall. Elsewhere, mild instabilities are expected to continue. A tropical wave is also embedded within the ITCZ and is expected to add to the atmospheric instability over Northern Guyana from tomorrow morning and continue into the afternoon. A brisk south-easterly flow is expected from Monday, which will likely result in stable conditions over Guyana. However, localized conditions can continue to produce isolated convection, especially over Inland Guyana.

Today's weather review: Cloudy with scattered showers, thundershowers, and rain were observed over most of Northern Guyana.

Saturday, 03 October 2026 (19:00 hrs – 07:00 hrs)			Sunday, October 04, 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Regions 1, 2, 6, 7, 8 and 10	 Rainfall between: 10.0 mm and 35.0 mm.	Cloudy to overcast skies with isolated to scattered showers of varying intensities; continuous rain and thundershowers can be expected over Regions 1, 2, 6, 7, 8 and 10 during the night. Regions 3 to 5 can expect partly cloudy to cloudy skies throughout the night, with light to moderate showers expected from the early morning hours. Region 9 can expect partly cloudy skies with no significant rainfall.	Regions 3 to 5	 Rainfall between: 5.0 mm and 15.0 mm.	Cloudy skies with isolated to scattered showers and periods of rain can be expected over Coastal Regions 3 to 5 during the morning. Improvements are expected from the afternoon as partly cloudy and sunny skies will prevail. Regions 1, 2, 6 to 8 and 10 will likely experience cloudy skies becoming overcast at times with scattered showers, intermittent rain and possible thundershowers from the mid-morning to afternoon period. Region 9 can expect partly cloudy skies with no significant rainfall.
Regions 3 to 5	 Rainfall between: 5.0 mm and 20.0 mm.	<u>Winds:</u> Gentle to moderate north-easterly to easterly breeze. Strong winds and lightning during thundershowers. <u>Minimum temperatures:</u> Coast: 23 °C – 25 °C Hinterland: 20 °C – 23 °C	Regions 1, 2, 6 to 8 and 10.	 Rainfall between: 5.0 mm and 20.0 mm.	Winds: Gentle to moderate north-easterly to easterly breeze. Possible strong winds and lightning during thundershowers. <u>Maximum temperatures:</u> Coast: 28 °C – 31 °C Hinterland: 31 °C – 33 °C

Georgetown's long-term daily average rainfall for the next 10 days, from October 03 to October 12, 2026, is 1.9 mm per day
