MINISTRY OF AGRICULTURE

WEATHER BRIEF for today Saturday, 10 October 2026, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Saturday, October 10, 2026 were available for most stations.

Hossororo Region 1 recorded the highest rainfall of 51.3 mm.

Severe Weather Warnings. The public is advised to take all necessary precautions as warmer than usual day and night-time temperatures are likely to continue across most of Guyana. In addition, areas of thundershowers, heavy winds, and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

Marine advisory: The spring tide advisory is in effect. Residents of low-lying, riverine, and flood-prone areas are advised to take the necessary precautions against flooding, as overtopping is likely.

Synopsis: *Ridging and an upper-level trough continue to be the dominant feature over most of Guyana. However, localized diurnal heating produced isolated pockets of convection over Inland areas along Regions 1 to 4 and 10. This convection is likely to continue over Inland Guyana during the evening hours. This pattern is likely to continue for the remainder of the week. Ridging is expected to be dominant over Coastal and Southern Guyana. Localized diurnal heating will produce isolated afternoon convection.*

Today's weather review: *Mostly fair and sunny skies were over Coastal and Southern Guyana. Isolated showers and thundershowers were seen over Inland areas.*

Saturday, 10 October 2026 (19:00 hrs – 07:00 hrs)			Sunday, October 11, 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions
