WEATHER BRIEF for today Sunday, 12 October 2025, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Sunday, October 12, 2025, were available for most stations.

Ebini in Region 10 recorded the highest rainfall of 44.3 mm.

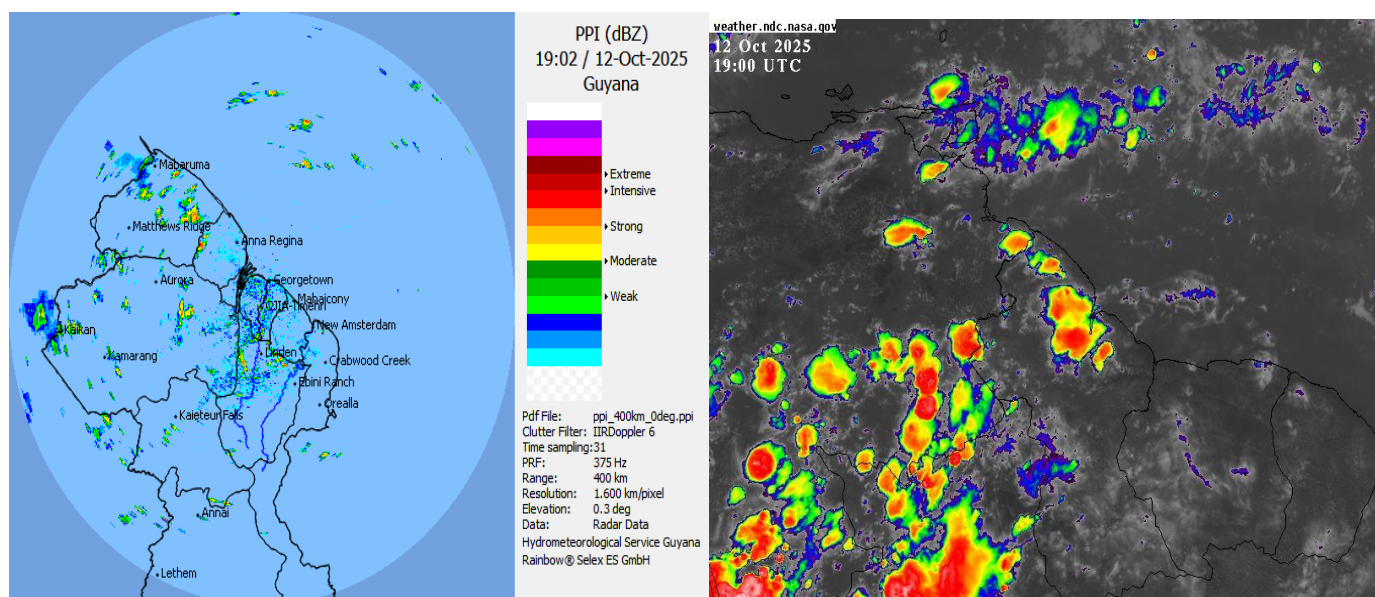

Severe Weather Advisory: In areas of thundershowers, lightning strikes and heavy winds may be observed. Persons should exercise caution in efforts to safeguard life and property.

Synopsis: *Most of the convective activity continued to be observed over the Inland and Hinterland areas during the afternoon. This is due to localized diurnal heating coupled with an increase in low-level moisture. This pattern is expected to continue for the remainder of the week. Coastal Guyana will also continue to experience brief isolated pockets of instability during the morning as low-level forcings persist over these areas.*

Today's weather review: *Cloudy skies with isolated to scattered showers were observed over the Inland and Hinterland areas. All other areas observed partly cloudy to sunny skies.*
