MINISTRY OF AGRICULTURE

WEATHER BRIEF for today Tuesday, 13 October 2026, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Tuesday, October 13, 2026 were available for most stations.

Karawab in Region 2 recorded the highest rainfall of 26.4 mm.

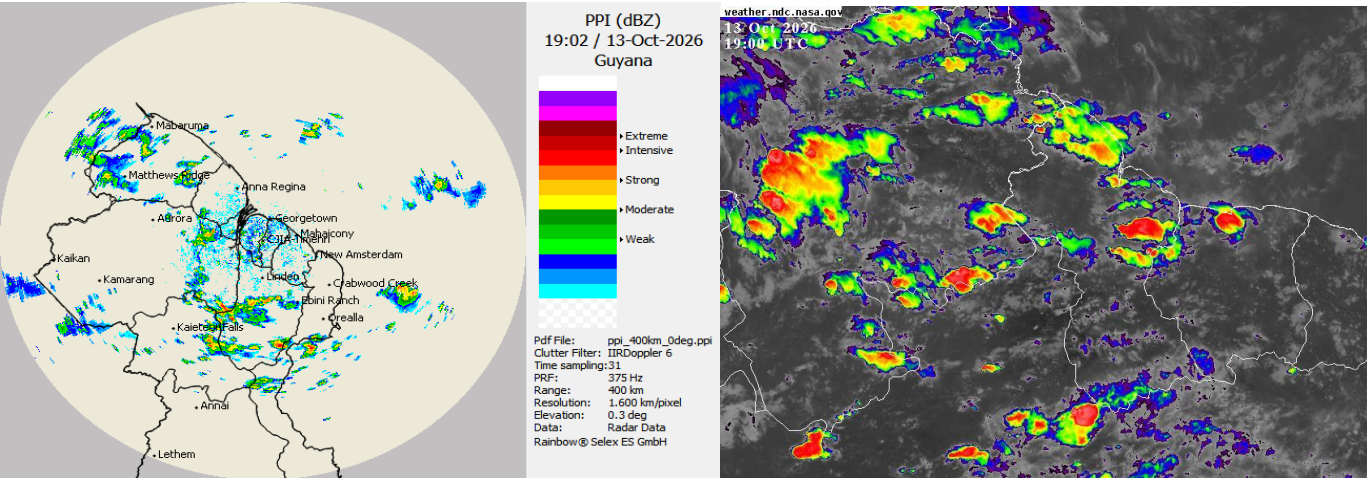

Severe Weather Warnings. The public is advised to take all necessary precautions as warmer than usual day and night-time temperatures are likely to continue across most of Guyana. In addition, areas of thundershowers, heavy winds, and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

Synopsis: Scattered pockets of instability were observed over Region 1, Inland and Southern Guyana. This is expected to continue to affect these areas into the night. Low-level troughing is also expected to affect Coastal Guyana during the early morning. However, a sheared mid- to upper-level flow will likely prevent the development of deep convective clouds. Most of the convective activity is expected to continue over Inland Guyana for the remainder of the week. Stable conditions are likely expected over Coastal and Southern Guyana for the rest of the week.

Today's weather review: *Isolated to scattered showers and thundershowers were observed over Regions 1, Inland and Southern Guyana.*

Tuesday, 13 October 2026 (19:00 hrs – 07:00 hrs)			Wednesday, October 14, 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Regions 1, 6, Inland and Southern Guyana	 Rainfall between: 10.0 mm and 35.0 mm.	Cloudy skies with scattered showers, thundershowers and rain can be expected over Regions 1, 6, Inland and Southern Guyana during the night. All remaining areas can expect partly cloudy to fair skies during the evening hours, with cloudy skies accompanied by isolated to scattered showers likely from the early morning. <u>Winds:</u> Gentle to moderate easterly to south-easterly breeze. Strong winds and lightning during thundershowers.	Coastal Regions 2 to 5	 Rainfall between: 0.0 mm and 10.0 mm.	Cloudy skies with isolated showers are likely to be experienced over Coastal Regions 2 to 5 during the morning.
