MINISTRY OF AGRICULTURE

WEATHER BRIEF for today Thursday, 15 October 2026, from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs Thursday, October 15, 2026 were available for most stations.

Capoey Lake in Region 2 recorded the highest rainfall of 33.3 mm.

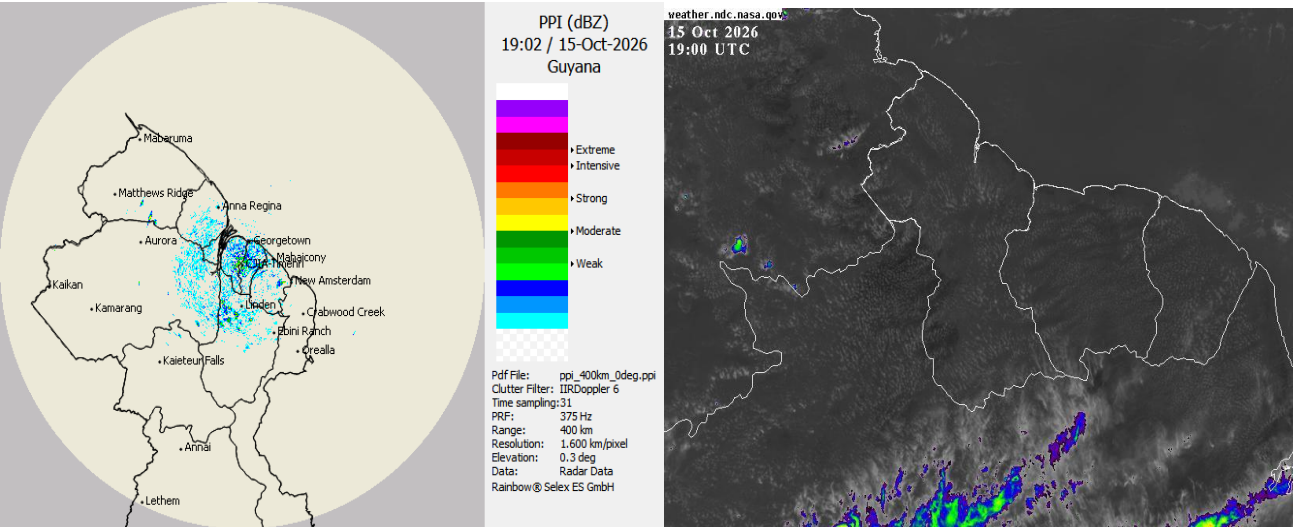

Severe Weather Warnings. The public is advised to take all necessary precautions as warmer than usual day and night-time temperatures are likely to continue across most of Guyana. In addition, areas of thundershowers, heavy winds, and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

Synopsis: Mostly dry and stable conditions continued over the forecast area. Ridging, lack of available moisture, and a highly sheared mid to upper levels are also contributing factors adding to the stability over most of Guyana. However, diurnal daytime heating produced isolated convection over parts of Inland areas. This pattern is expected to continue for the next 12 to 48 hours. An increase in moisture is expected on Sunday and is likely to continue into Tuesday. This is due to low-level convergence and the passage of a tropical wave. Isolated to scattered instability is expected over Northern Guyana.

Today's weather review: Mostly fair and sunny skies were observed over most of Guyana.

Thursday, 15 October 2026 (19:00 hrs – 07:00 hrs)			Friday, October 16, 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Inland areas	 Rainfall between: 0.0 mm and 5.0 mm.	Mostly fair and clear skies are likely to continue over Coastal Guyana throughout the night. Inland areas and parts of Southern Guyana can expect brief isolated showers during the evening hours, with mostly fair skies likely to persist from the early morning. <u>Winds:</u> Gentle to moderate easterly to south-easterly breeze. Strong winds and lightning during thundershowers.	Coastal Regions and Southern Guyana	 No significant rainfall expected.	Mostly sunny skies are likely to continue over most of Coastal Guyana. However, Inland areas and parts of Southern Guyana can expect partly cloudy to cloudy skies with isolated showers and thundershowers from the afternoon. <u>Winds:</u> Moderate to fresh easterly to south-easterly breeze. Possible strong winds and lightning during thundershowers.
Coastal and Southern Guyana	 No significant rainfall expected.	<u>Minimum temperatures:</u> Coast: 23 °C – 26 °C Hinterland: 21 °C – 24 °C	Inland areas	 Rainfall between: 0.0 mm and 10.0 mm.	<u>Maximum temperatures:</u> Coast: 31 °C – 33 °C Hinterland: 33 °C – 38 °C

Georgetown's long-term daily average rainfall for the next 10 days, from October 15 to October 24, 2026, is 2.5 mm per day
