**WEATHER BRIEF for today Tuesday, 09 September 2025, from the Hydrometeorological Service, Guyana**

*Rainfall records for the past 24 hours, measured at 08:00 hrs Tuesday, September 9, 2025, were available for most stations.*

***Mabaruma in Region 1 recorded the highest rainfall of 22.0 mm.***

**Severe Weather Warnings:** In areas of thundershowers, heavy winds and lightning strikes may be observed. Persons are asked to be alert and exercise caution in efforts to safeguard life and property.

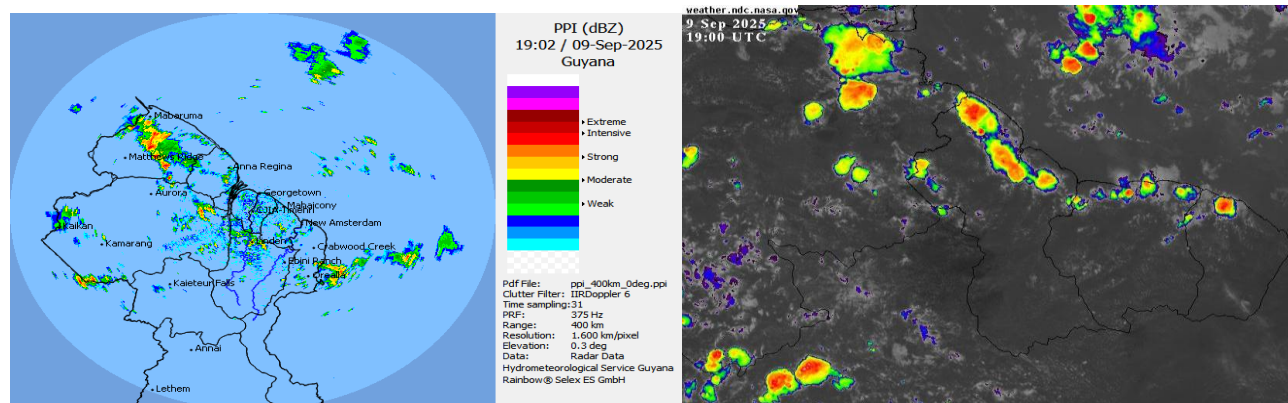

**Marine Warning:** Citizens are advised that the spring tide advisory is in effect. Residents of low-lying, riverine, and flood-prone areas are advised to take the necessary precautions against flooding, as over-topping is likely.

**Synopsis:** A tropical wave created mild to moderate instabilities over Regions 1 to 5 and 7 during the day. The effects of this wave are expected to last until tomorrow morning in Regions 1 and 7. Inland areas and parts of Southern Guyana also saw mild to moderate instabilities due to diurnal daytime heating. Meteorological models are indicating that the ridge will become the dominant feature as the week progresses, leading to mostly stable conditions. However, diurnal heating will likely continue to produce localized convection over Inland Guyana.

Today's weather review: Cloudy skies with scattered showers and thundershowers were observed over the Inland areas of Regions 1 to 5 and Region 7. Partly cloudy to sunny skies elsewhere.

Tuesday, 09 September 2025 (19:00 hrs – 07:00 hrs)			Wednesday, 10 September 2025 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions		Regions	Weather Conditions	
Coastal Guyana	 <p>Rainfall between: 0.0 mm and 5.0 mm</p>	Coastal Guyana can expect partly cloudy to fair skies during the evening hours, with conditions expected to slightly deteriorate from the morning hours, as partly cloudy skies with isolated showers will likely be experienced. Inland and Southern Guyana can expect cloudy skies with isolated to scattered showers and thundershowers during the evening hours, with improvements expected as the night progresses.	Coastal Guyana	 <p>No significant rainfall expected.</p>	Partly cloudy to sunny skies will likely be experienced over Coastal Guyana throughout the day. Inland and Southern Guyana can expect cloudy skies with isolated to scattered showers and thundershowers from the afternoon.
Inland and Southern Guyana	 <p>Rainfall between: 5.0 mm and 20.0 mm</p>	<p><u>Winds:</u> Gentle to moderate north-easterly to easterly breeze. Strong winds and lightning strikes occur during thundershowers.</p> <p><u>Minimum temperatures:</u></p> <p>Coast: 22 °C – 24 °C</p> <p>Hinterland: 19 °C – 22 °C</p>	Inland and Southern Guyana	 <p>Rainfall between: 0.0 mm and 10.0 mm.</p>	<p><u>Maximum temperatures:</u></p> <p>Coast: 30 °C – 32 °C</p> <p>Hinterland: 32 °C – 34 °C</p>

*Georgetown's long-term daily average rainfall for the next 10 days, from September 09 to September 18, 2025, is 3.1 mm per day.*
