Marine Advisory: Spring tides combined with high waves may result in overtopping of river and sea defences in vulnerable areas. Residents in these locations are strongly advised to remain vigilant, closely monitor conditions, and exercise extreme caution during this period.

Weather Brief for Wednesday, 21 January 2026 from the Hydrometeorological Service, Guyana.

Rainfall records for the past 24 hours, measured at 08:00hrs Wednesday, 21 January 2026 were available for most of the stations. De Kinderen Back Region 3 recorded the highest rainfall of 67.4 mm.

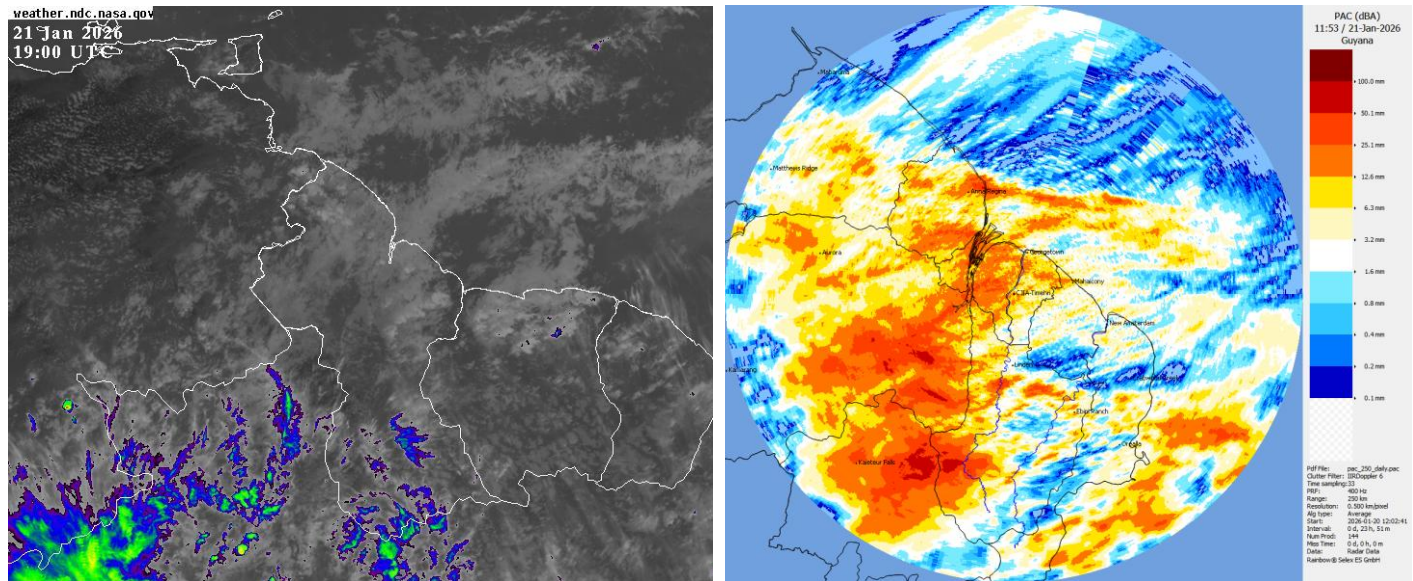

Synopsis: Weak to moderate convective instabilities embedded within a deep layer of low-level moisture continue to affect Guyana. This synoptic pattern is expected to persist through the remainder of the week, with additional low-level troughing forecast to develop and propagate across the area from Friday onward, potentially enhancing convective activity.

Today's weather review: Mostly cloudy skies with scattered showers and intermittent rain.

Table # 1 Weather forecast for the next twenty-four hours

Wednesday, 21 January 2026 (19:00 hrs – 07:00 hrs)			Thursday 22, January 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions	Cloudy skies will continue across Guyana with brief to scattered showers over coastal areas in the early morning. <u>Winds:</u> Gentle to moderate northeasterly breeze. <u>Minimum temperatures:</u> Coast: 22 °C – 24°C Hinterland: 20 °C – 22 °C	Regions	Weather Conditions	Cloudy to overcast skies with intermittent to frequent showers and rain. <u>Winds:</u> Moderate north to northeasterly breeze. <u>Maximum temperatures:</u> Coast: 28 °C – 30 °C Hinterland: 29 °C – 31 °C

SPRING TIDE ADVISORY: The public is reminded that the Spring Tide Advisory remains in effect until Saturday, January 24, 2026, and coastal residents should continue to exercise caution. Spring tides coupled with high waves may lead to overtopping of the river and sea defence vulnerable areas.

Sea conditions:

- Open waters are expected to be moderate to rough, with northeasterly swells reaching 2.0 to 3.0 metres (6 to 8 feet) and remaining steady.

- Wave periods are forecast to range between 9 and 10 seconds.

- Moderate northeasterly to easterly breezes are also expected.

Extended Forecast

Friday to Tuesday, mostly cloudy to occasionally overcast skies can be expected across Guyana with intermittent to frequent showers and rain. Rainfall is anticipated to be between 20 and 50 mm within 24 hours of accumulation.

For the Regional climate forecast, please see Guyana's Seasonal Climate Outlook January to March 2026, produced by the Climatological section of the Hydrometeorological Service and available on the website: <http://hydromet.gov.gy/weather/seasonal-outlook/>
