Ministry of Agriculture, Guyana

Weather Brief for Wednesday, 11 March 2026 from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00hrs Wednesday, 11 March 2026 were available for most of the stations. **Mahdia in Region 8 recorded the highest rainfall of 20.0 mm.**

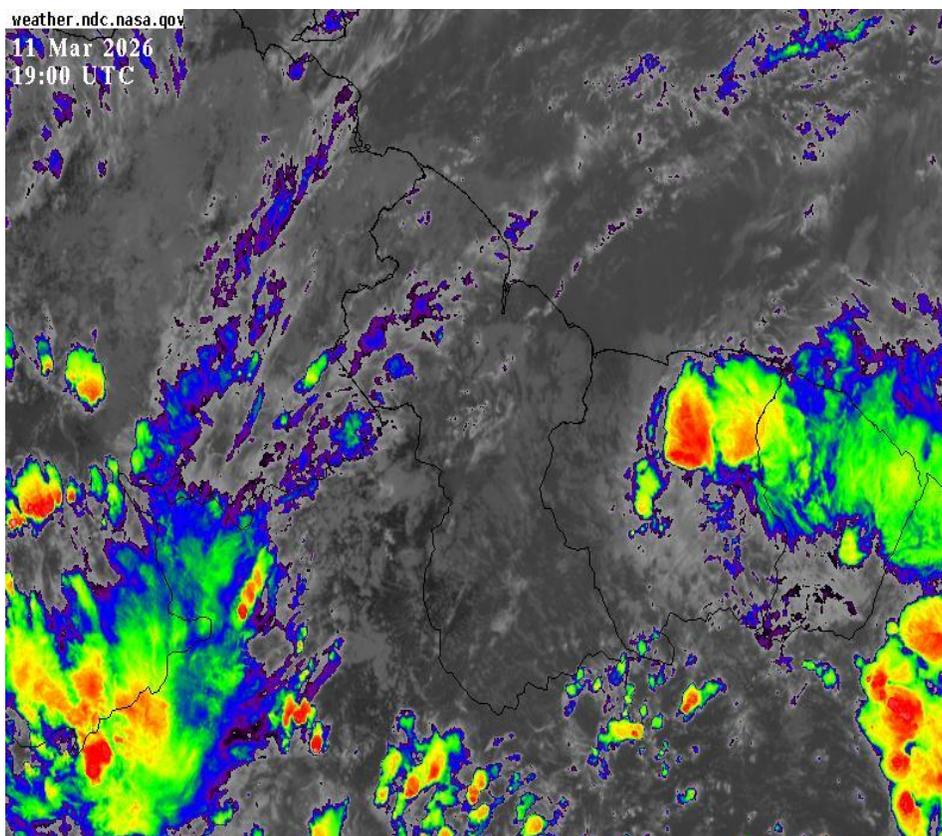

Synopsis: The Atlantic high-pressure system continues to generate moderate to fresh winds across the forecast area. The mid-level continues to be capped by subsidence hindering deep convection; however, lower levels project a significant increase in moisture from tomorrow afternoon into the weekend, along with troughs and convergence, which will likely generate weak to moderate instabilities.

Today's weather review: Fair to partly cloudy skies with a few brief showers were observed.

Table # 1 Weather forecast for the next twenty-four hours

Wednesday, 11 March 2026 (19:00 hrs – 07:00 hrs)			Thursday, 12 March 2026 (07:00 hrs – 19:00 hrs)
