**MINISTRY OF AGRICULTURE**

**Spring Tide and Marine Advisory:** Residents are reminded that the Spring Tide Advisory remains in effect until May 21, 2026. Low-lying coastal communities, especially vulnerable areas, may experience overtopping during periods of high tide, which could result in minor flooding. Additionally, strong surface winds are expected to produce rough sea conditions. Fisherfolk and small craft operators are advised to exercise caution and take the necessary measures to safeguard life and property.

**Weather Brief for Saturday, 16 May 2026 from the Hydrometeorological Service, Guyana.**

Rainfall records for the past 24 hours, measured at 08:00 hrs available for most of the stations.

Moco Moco in Region 9 recorded the highest rainfall of 65.1mm.

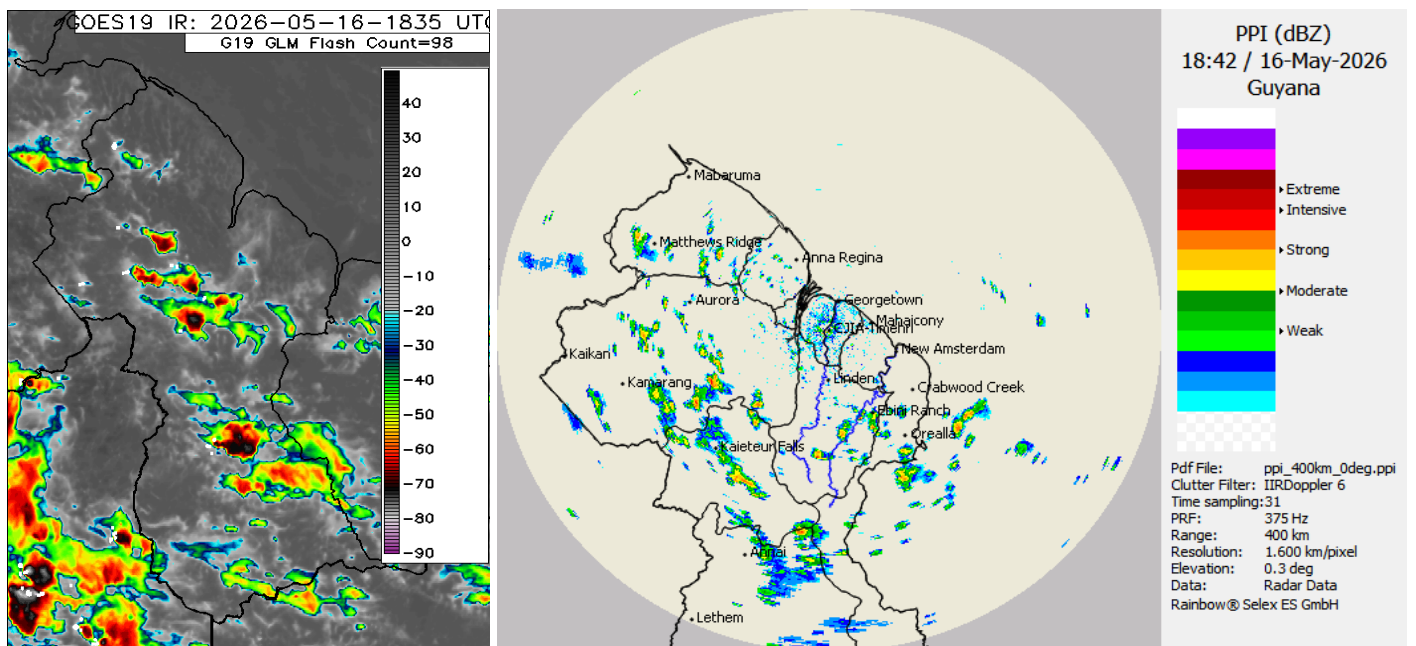

**Synopsis:** Weak instabilities associated with the high-pressure ridge are affecting Guyana. Combined with the presence of Saharan dust and strong surface winds, these conditions have resulted in short, sharp showers. More unstable conditions are expected from Tuesday through Thursday with the passage of Tropical Wave #4, followed thereafter by the influence of the ITCZ

**Today's weather review:** Sunshine and clouds with scattered showers were observed throughout Guyana.

Table # 1 Weather forecast for the next twenty-four hours

Saturday, 16 May 2026 (19:00 hrs – 07:00hrs)			Sunday 17 May, 2026 (07:00 hrs – 19:00 hrs)
