Hydrometeorological Service

Ministry of Agriculture, Guyana

Weather Brief for Wednesday, 04 November 2026 from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs, Wednesday, 04 November 2026 were available for most of the stations. Parkia in Region 3 recorded the highest rainfall of 8.0 mm in the past 24hrs.

Heat Advisory: The public is advised to take all necessary precautions as warmer than usual day and night-time temperatures are likely to continue across most of Guyana.

Synopsis: Mid-upper-level wind shear, along with ridge and subsidence throughout the atmosphere, dominated, generating mainly stable conditions; however, trade-wind moisture plumes, coupled with localized conditions, generated weak isolated instabilities over inland and southern parts of the country in the afternoon. Similar atmospheric conditions are projected for the next 2 to 4 days.

Today's weather review: Aside from a few brief afternoon showers over regions 1 to 3, 7, and 10, skies were mainly sunny.

Table # 1 Weather forecast for the next twenty-four hours
