Heat Advisory: Higher-than-normal temperatures are expected across Guyana, with unusually warm conditions persisting during the overnight hours. The combination of daytime heat and limited nighttime cooling may increase the risk of heat-related illnesses, particularly among vulnerable persons and those engaged in prolonged outdoor activities. The public is urged to take necessary precautions and remain alert for signs of heat-related illness

Weather Brief for Sunday, 01 November 2026 from the Hydrometeorological Service, Guyana.

Saxacalli in Region 3 recorded the highest rainfall of 14.1 mm in the past 24hrs.

Synopsis: The High-pressure ridge and a very dry atmosphere remain the dominant features affecting Guyana.

Today's weather review: Sunny skies were observed with a few passing showers.
