

Weather Brief for Thursday, 08 October 2026 from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00 hrs, Thursday, 08 October 2026 were available for most of the stations. **Bartica Forestry Region 7 recorded the highest rainfall of 14 mm in the past 24 hours.**

Severe Weather Advisory: The public is advised to take all necessary precautions as warmer than usual day and night-time temperatures are likely to continue across most of Guyana.

Marine Advisory: Spring tide is in effect; people in riverine and low-lying coastal areas should take necessary precautions, as river and sea defenses are likely to overtop.

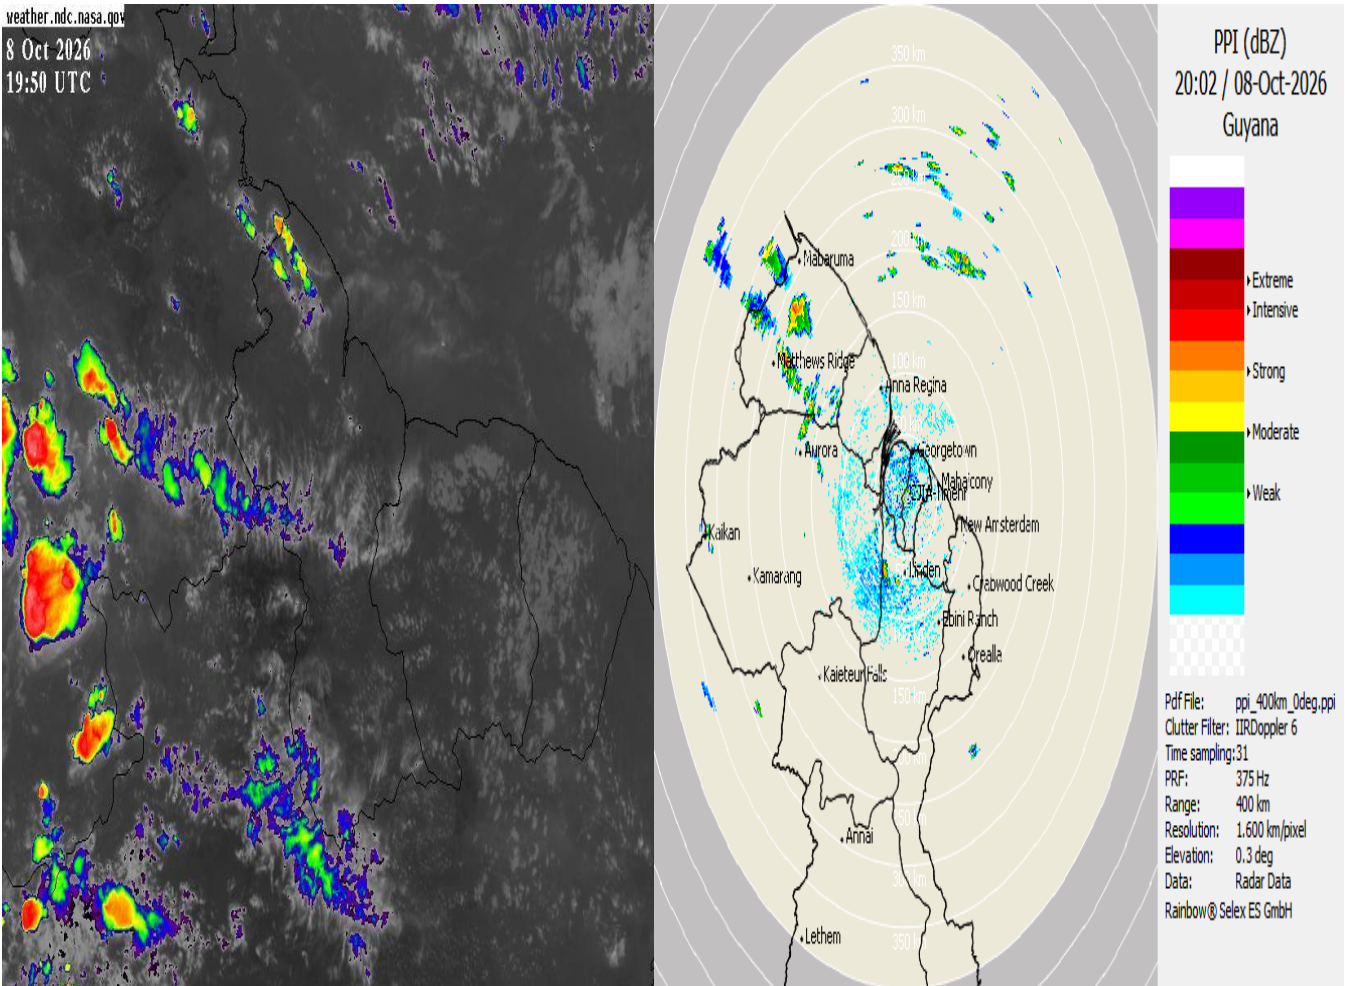

Synopsis: Apart from weak instabilities over regions 1 and 2 by trade winds and localized effects. Subsidence, ridge, and mid-upper-level wind shear all contributed to generating mostly stable conditions across the forecast area.

Today’s weather review: Apart from a few showers over regions 1 and 2, elsewhere mainly fair and sunny skies dominated.
