

HYDROMETEOROLOGICAL SERVICE
MINISTRY OF AGRICULTURE

Weather Brief for Friday, 02 October 2026 from the Hydrometeorological Service, Guyana.

Annai in Region 9 recorded the highest rainfall of 17.3 mm in the past 24 hours.

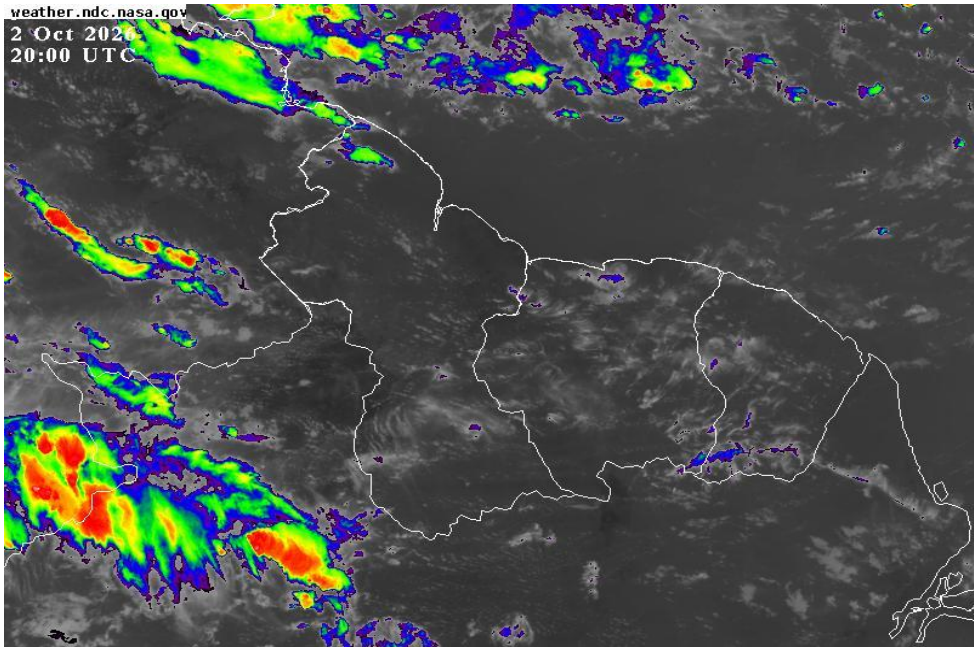

Synopsis: The high-pressure ridge is currently controlling the weather. Over the weekend, the Intertropical Convergence Zone (ITCZ) is expected to become active again, which could lead to an increase in showers and possible thunderstorms.

Today's weather review: Sunny skies were observed throughout Guyana.

Table # 1 Weather forecast for the next twenty-four hours

Friday, October 2, 2026 (7 pm to 7 am)			Saturday, October 3, 2026 (7 am to 7 pm)		
Regions	Weather Conditions		Regions	Weather Conditions	
Regions 1 to 10	 No significant rainfall is expected.	Fair skies will become cloudy in the early morning, with possible isolated showers over coastal areas. <u>Winds:</u> A gentle to moderate northeasterly breeze is expected. <u>Minimum temperatures:</u> Coast: 25 °C – 26 °C Hinterland: 24 °C – 25 °C	Regions 1 to 10	 Rainfall is expected to be less than 30 mm. Sea conditions:

Open waters are expected to be gentle to moderate, with northeasterly waves reaching 1.0 to 2.0 meters (3 to 5 feet).

- These waves will likely have periods of between 11 and 12 seconds.
- Gentle to moderate northeast to easterly breeze.

Extended Forecast

Sunday: Cloudy skies with scattered to occasional morning showers. Rainfall is anticipated to be between 10 and 20 mm.

Monday to Thursday: Cloudy skies during the morning becoming sunny in the afternoon with possible localised thunderstorms. No significant rainfall is anticipated.
