**MINISTRY OF AGRICULTURE**

Weather Brief for Thursday, 08 January 2026 from the Hydrometeorological Service, Guyana  
Rainfall records for the past 24 hours, measured at 08:00hrs Thursday, 08 January 2026 were available for most of the stations. **Richmond Hill Leguan in Region 3 recorded the highest rainfall of 29.7 mm.**

**Marine Advisory:** Spring tides may cause overtopping of river and sea defences in vulnerable areas. Persons are asked to exercise all precautionary measures during this time.

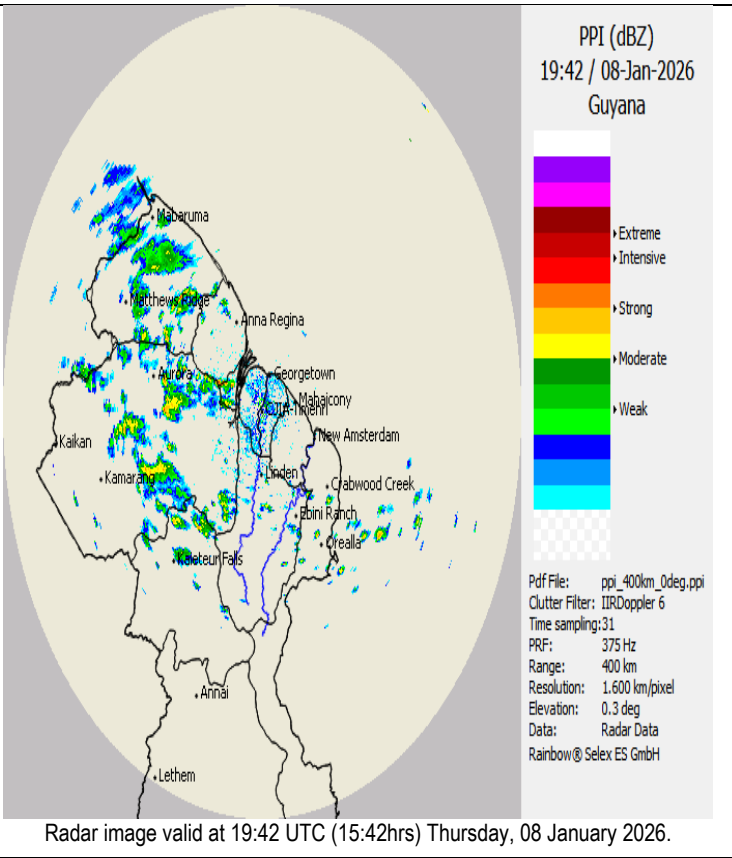

**Synopsis:** Surface to lower atmospheric troughs and confluence associated with high moisture produced mild to moderate instabilities over northern regions, as the remaining southern regions are dominated by subsidence and shearing, which generated mainly stable conditions. From tomorrow, models indicate a significant increase in moisture and instabilities over the northern regions of the country, while mild instabilities are projected for the southern regions. This pattern is projected for the next 3 to 4 days.

**Today's weather review:** Southern regions 6 and 9 observed mostly fair and sunny skies, while the remaining regions observed partly cloudy and sunny skies with scattered to frequent light to moderate showers.

Table # 1 Weather forecast for the next twenty-four hours

Thursday, 08 January 2026 (19:00 hrs – 07:00 hrs)			Friday, 09 January 2026 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions	Coastal regions can expect fair skies to become cloudy in the morning with showers. Elsewhere, cloudy skies with showers are expected to become mostly fair in the morning.  Winds: Light to moderate easterly breeze.  <u>Minimum temperatures:</u>  Coast: 21 °C – 26°C  Hinterland: 18 °C – 24 °C	Regions	Weather Conditions	Southern regions 6 and 9 can expect partly cloudy skies with brief showers, remaining regions mostly cloudy skies with intermittent showers and rain.  Winds: Gentle to moderate easterly breeze.  <u>Maximum temperatures:</u>  Coast: 26 °C – 29 °C  Hinterland: 27 °C – 30 °C
All regions	 <b>Rainfall between 0 &amp; 10 mm.</b>		Southern regions 6 & 9.	 <b>Rainfall between 0 &amp; 10 mm.</b>	
			Other regions.	 <b>Rainfall between 20 &amp; 50 mm.</b>	

The long-term daily average rainfall for Georgetown for the next 10 days, January 9 to 18, 2026, is 7.0 mm per day.

**Our Mission:** To Observe, archive and understand Guyana’s weather, and Climate and provide meteorological, hydrological and oceanographic service in support of Guyana’s national needs and international obligation.
