Weather Brief for Tuesday, 01 July 2025 from the Hydrometeorological Service, Guyana

Rainfall records for the past 24 hours, measured at 08:00hrs Tuesday, 01 July 2025 were available for most of the stations. **Lovely lass in Region 5 recorded the highest rainfall of 64.1mm.**

Severe Weather Advisory: Strong winds and lightning strikes will likely occur in areas of thundershowers. Persons should exercise caution in efforts to safeguard life and property.

Marine Advisory: None at this time.

Synopsis: Surface confluence and low-level troughs produced mild to moderate instabilities over mostly northern regions of the forecast area. Similar atmospheric conditions are expected for tomorrow and from Thursday, Tropical wave #9 is projected to impact Guyana, affecting mostly northern regions of the country.

Today’s weather review: Partly cloudy and sunny skies with isolated afternoon showers were observed over regions 8 and 9. Elsewhere, mostly cloudy skies with light to moderate showers, intermittent rain, and isolated thundershowers.
