Weather Brief for Saturday, 01 November 2025 from the Hydrometeorological Service, Guyana
Rainfall records for the past 24 hours, measured at 08:00hrs Saturday, 01 November 2025 were available for most of the stations. **Sophia in Region 4 recorded the highest rainfall of 20.2 mm.**

Severe Weather Advisory: Strong winds and lightning strikes are possible in areas of thundershowers. Persons are advised to exercise caution.

Marine Advisory: Strong surface winds, coupled with spring tides, will generate rough and dangerous seas, leading to possible overtopping and damage to river and sea defenses. Marine users and persons along coastal and riverine areas are advised to exercise caution to safeguard life and property.

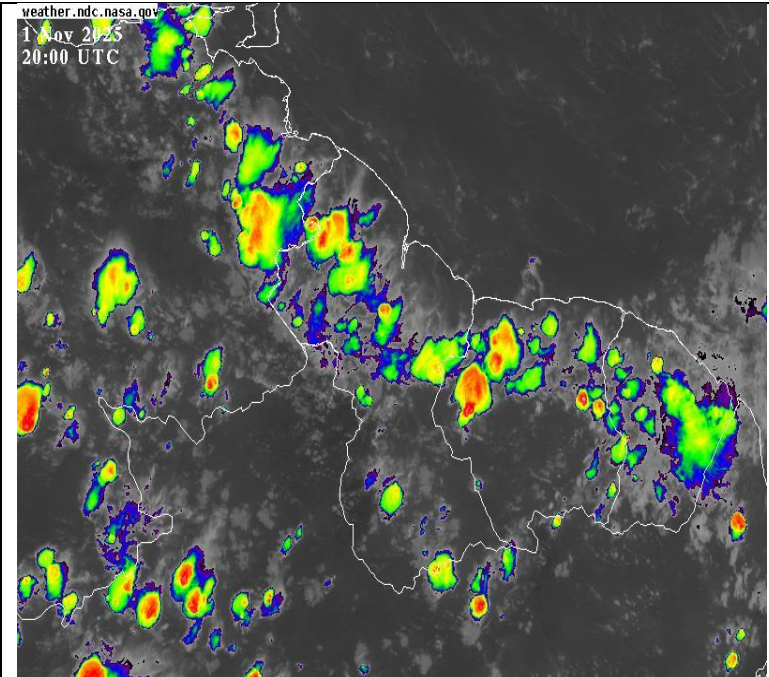

Synopsis: Surface to lower atmospheric troughs and confluent associated with very high moisture generated weak to strong instabilities over the forecast area.

Today's weather review: Coastal Guyana observed morning cloudy skies with frequent showers and isolated thundershowers, becoming mostly fair and sunny afterwards. All other areas observed partly cloudy and sunny skies in the morning, becoming cloudy to overcast in the afternoon with occasional rain, thundershowers, and showers.

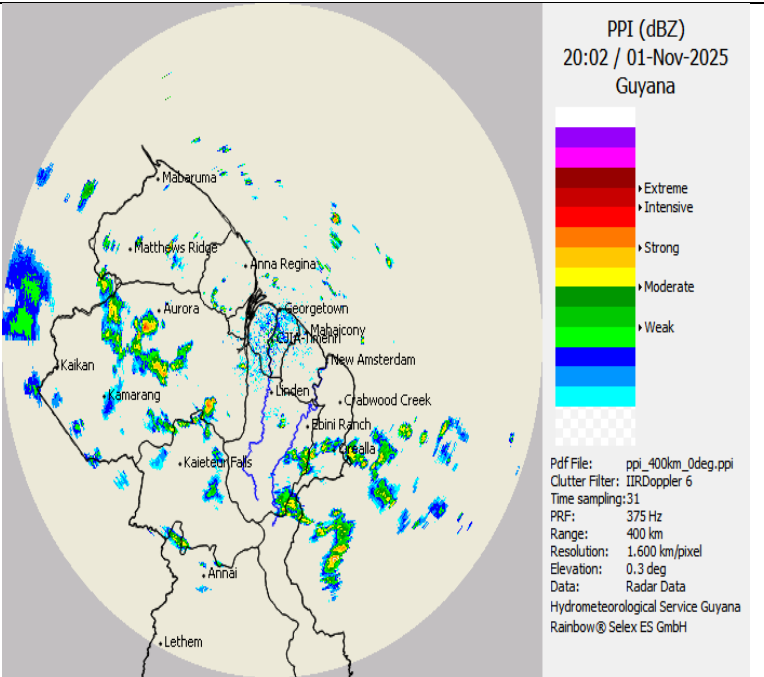

Table # 1 Weather forecast for the next twenty-four hours

Saturday, 01 November 2025 (19:00 hrs – 07:00 hrs)			Sunday, 02 November 2025 (07:00 hrs – 19:00 hrs)
