HYDROMETEOROLOGICAL SERVICE MINISTRY OF AGRICULTURE

Weather Brief for Friday, 14 November 2025 from the Hydrometeorological Service, Guyana Rainfall records for the past 24 hours, measured at 08:00hrs Friday, 14 November 2025 were available for most of the stations. Dagg Point in Region 7 recorded the highest rainfall of 36.0 mm.

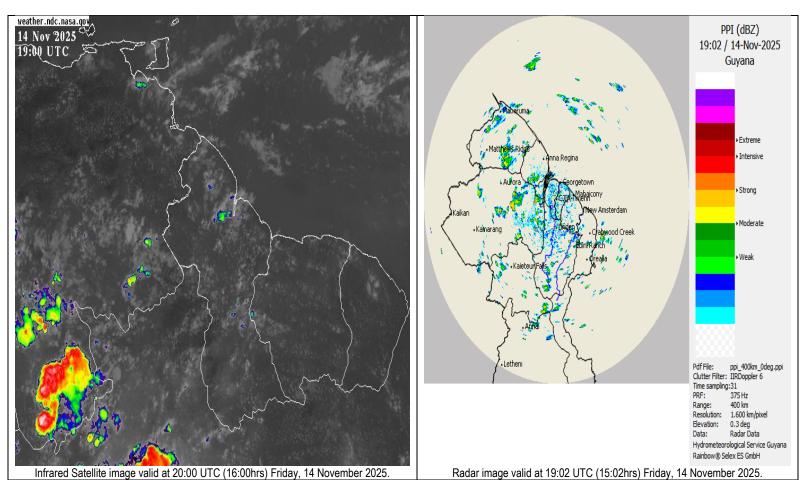

Marine Advisory: Long-period-high-energy waves can cause damage to the river and sea defences in vulnerable areas. Persons should exercise caution to safeguard life and property.

Synopsis: Moisture convergence and small amplitude low-level troughs enhanced by the ITCZ produced moderate to strong instabilities over most of the country. Dynamic models show projections of similar atmospheric conditions for the next 3 days, with northern regions of the country expected to have the most impact.

Today's weather review: Cloudy spells with occasional showers were observed across Guyana.

Friday, 14 November 2025 (19:00 hrs – 07:00 hrs)			Saturday, 15 November 2025 (07:00 hrs – 19:00 hrs)
