Weather Brief for Wednesday, 29 October 2025 from the Hydrometeorological Service, Guyana
Rainfall records for the past 24 hours, measured at 08:00hrs Wednesday, 29 October 2025 were available for most of the stations. **Santa Rosa in Region 1 recorded the highest rainfall of 33.8 mm.**

Synopsis: Continued dry air intrusion and ridging throughout most levels of the atmosphere, leading to mainly subsidence and stable conditions across the forecast area. However, trade wind moisture plumes and localized conditions produced some short-lived isolated to scattered instabilities. Similar atmospheric conditions are likely for the next 2 days, after which models project an increase in moisture and instabilities throughout the levels of the atmosphere over most of Guyana.

Today’s weather review: Coastal Guyana observed mainly sunny skies, all other areas observed partly cloudy and sunny skies with afternoon isolated to scattered showers and thundershowers.

Table # 1 Weather forecast for the next twenty-four hours

Wednesday, 29 October 2025 (19:00 hrs – 07:00 hrs)			Thursday, 30 October 2025 (07:00 hrs – 19:00 hrs)		
Regions	Weather Conditions	Inland regions 6 to 10 can expect partly cloudy skies with scattered evening showers. All other regions can expect mostly fair skies. Winds: Moderate to fresh easterly breeze. <u>Minimum temperatures:</u> Coast: 22 °C – 25°C Hinterland: 19 °C – 23 °C	Regions	Weather Conditions	Regions 1 to 3 and 7 can expect partly cloudy skies with frequent showers and isolated thundershowers. Elsewhere, partly cloudy and sunny skies with a few morning and afternoon showers. Winds: Moderate to fresh easterly breeze. Gusting before and during heavy downpours/thundershowers. <u>Maximum temperatures:</u> Coast: 30 °C – 34 °C Hinterland: 31 °C – 36 °C
Inland regions 6 to 10.	 Rainfall between 0 & 10 mm.		Regions 1 to 3 & 7	 Rainfall between 10 & 20 mm.	
Other regions.	 No significant rainfall.		Other regions.	 Rainfall between 0 & 5 mm.	

The long-term daily average rainfall for Georgetown for the next 10 days, October 30 to November 08, 2025, is 4.3 mm per day.

Our Mission: To Observe, archive and understand Guyana’s weather, and Climate and provide meteorological, hydrological and oceanographic service in support of Guyana’s national needs and international obligation.
